Glu balanced cohort: source of birth-size drift
Observed birth-size drift
Arithmetic mean
Geometric mean
Birth size
Generation
Exact additive decomposition
$E[\log f]$
$E[\varepsilon]$
$E[\alpha]E[\tau]$
$\mathrm{Cov}(\alpha, \tau)$
$E[\Delta \log b]$
Mean log-size contribution per cycle
Starting generation
Growth rates and division times
Mean α
Mean τ
Mean relative to generation 0
Starting generation
Within-generation α–τ association
Correlation
Starting generation
